It is reported that the present staff in the Bureau of Sanitary Engineering is not enough to undertake the work. The Director of Health therefore recommends that one Overseer and two Sub Overseers may be appointed for a period of one year, the cost being met from the funds of the Mysore city Municipality. 2 It would have been well if the Director of Health had also consulted the President, Mysore city Municipality in the matter before making a recommendation to Govt. 3 A copy of the Director's letter may perhaps be sent to the President, Mysore city Municipal

Letter No. 353 dated 20/23rd November 1936 from the Sanitary Engineer, Bureau of Sanitary Engineering, to the Director of Health in Mysore, Bangalore.

Mysore City Drainage.

I have the honour to inform you that the Chairman of the City Improvement Trust Board, Mysore has requested in his No.638 dated 6-11-1936 that a scheme might be got up by this Department for providing necessary sanitary underground drainage works in the unconnected portions of the City and has sent old estimates and files relating to the subject on my requisition

In this connection I am tostate that all the executive staff attached to the Bureau have been fully engaged on works and a few Suboverseers are put on the work of preparing comprehensive projects pertaining to mofussil places of the State which are about 20 in number.

As the scheme for the Mysore City is to be prepared with care and verified with old works already done, it will not be possible to get the work done promptly with the available staff I therefore request you to kindly obtain early sanction of Government for an additional staff consisting of one Overseer and two Suboverseers for a period of at least one year for this special work

On receipt of hands, the preparation of the scheme will be taken on hand.
